【Courses for the General Degree Program】 A course code is consisted of three letters and four digits. The first two letters represent the department/graduate institute offering the course (e.g., ED refers to the Department of Education; PC represents the Department of Educational Psychology and Counseling). The third letter denotes the level of study (e.g., U: undergraduate courses; M: master's courses; D: doctoral courses; C: courses offered to students from different degree programs). Finally, the four digits stand for the specific serial number of the course.

[Courses for the In-Service Master's Degree Program] A course code is consisted of three letters and four digits. The first two letters represent the department/graduate institute offering the course (e.g., CH refers to the Department of Chinese). The third letter (i.e., P) indicates that the course is offered by the in-service master's degree program. The first digit denotes the information regarding the target class participants (i.e., 5: the course is offered to teachers; 7: the course is offered to the students from the executive master's degree program). The remaining three digits represent the specific serial number of the course.
